Kentish Aquatic Club Life Membership

Process for Nominating and Granting Life Membership

1. Rule 5. (14) of the Constitution provides that Life Membership may be granted by the Committee in recognition of services rendered to the Club.
2. Nominations for Life Membership must be lodged with the Secretary by written submission addressing how the nominee measures up against the Life Membership criteria
3. The nomination should be assessed by the Life Membership subcommittee. [Comprising the current President, (Chair of Life Membership subcommittee), Vice-President and immediate Past President]. Should a member of the subcommittee not be available for a substantial part of the period allocated for consideration, the remaining members may co-opt another subcommittee member with suitable background.
4. The subcommittee must consider the nomination against the Life Membership criteria in light of the general principles. Each nomination must be considered on its merits. In considering the nomination, members of the subcommittee must not be influenced by any personal relationship with the nominee
5. The subcommittee should provide its decision to the General Committee within three months of receipt of the nomination by the President. The subcommittee may provide a statement of reasons for the decision.
6. The general Committee will ratify the decision at its next meeting. It may, on motion of one, seconded by another and passed by a vote of 80% of those voting, veto the decision of the subcommittee on reasonable grounds.
7. If the nominee is a member of any group considering the nomination, the nominee is to stand aside from deliberations.
8. The Life Membership must be recorded in the Club's official records.

General Guidelines ... principles which should be considered before granting Life Membership

1. The granting of Life Membership is a great honour and should not be treated lightly. In normal circumstances, one or less Life Memberships should be awarded in any year. Nominees should be **genuinely worthy**.
2. Life Membership should not be considered as a competitive matter. Genuinely worthy nominees must be assessed on an individual basis and on their personal attributes, contributions and achievements, not in comparison with others.
3. Granting Life Membership is a balancing exercise. Criteria are provided for guidance, but it is the overall contribution of the nominee that must be evaluated. There is necessarily some subjectivity in the granting of Life Membership. Nominees' strengths against the various criteria will vary. Some nominees will be extremely strong in some criteria but weaker against others, others will be more rounded.

Kentish Aquatic Club Inc ByLaws and Policies

4. Life Membership is reserved for those whose **contribution is above the ordinary** for an **extended period of time**, not just a few years. It is important that the awarding of **Life Membership should reflect the contribution of an individual rather than simply the length of membership of an individual**.

Criteria to be considered in granting Life Membership

1. *Length of effective membership*

To have contributed to the Club to the degree necessary for Life Membership, a nominee will almost necessarily have been a Member and involved for a significant time. While there is no 'minimum' period of membership, a period of 15 years' active membership is an indicator of a long term commitment.

2. *Positions held and length of time*

The nominee should have a history of significant contribution to the functioning of the Club over a majority of those years of membership. This may include:

- a. Significant contributions while holding positions on the Committee (membership of such committees does not of its own mean a person has made significant contributions),
- b. Making significant contributions in general club roles and activities or to a delegated committee etc
- c. Willingness to participate or take on responsibilities to a much greater extent than the average Member as a regular, consistent and reliable contributor.

3. *History of Fostering Development*

The nominee should be able to demonstrate active contribution to the development of the Club by being a regular and consistent organizer or worker. It would be expected that a Life Member would normally have significantly contributed to club programs or projects such as: junior development, training & skills development, infrastructure /facilities and or administration

4. *History of Contribution*

The nominee should be able to demonstrate a willingness to take on responsible roles contributing to social events, club welfare and maintenance Furthermore it would be expected that a Life Member would normally have contributed significantly to the ongoing general development of the Club and its governance.

4. *History of Activity*

Life Members should be or have been active skiers, participating regularly in club activities/ events. Nominees should have been active in encouraging involvement in and the fostering of waterskiing as a sport. Ideally nominees should not only have a long history with the Club but continue to do so at the time of nomination (i.e. it would be appropriate to acknowledge their efforts while they are able to enjoy the honour).

5. *General Considerations*

The general attitude and overall demeanor of the nominee should be one of good spiritedness towards all members and a dedication to the Club, together with a demonstrated commitment to upholding the principals of good leadership, positive role modeling and good sportsmanship which reflects the Club values.
